

Our rubber panels take advantage of unique compounds and designs, maximizing the inherent properties of rubber in mining applications:

- ✓ **energy absorption**
- ✓ **noise reduction- 50% reduction compared to steel**
- ✓ **available in a wide range of sizes and apertures, including 300x300mm, 305x305mm, 630x305mm**

Unique patented aperture designs optimise throughput and minimise blinding.

Square, slotted round and customised apertures

Various fixing options

Longlife and consistent product quality

Customised hardness ranges available to optimise performance
